

uMR Ultra

**From Photography
to Videography**

ABOUT UIH

At United Imaging, we develop and produce advanced medical products, digital healthcare solutions, and intelligent solutions that cover the entire process of imaging diagnosis and treatment. Founded in 2011 with global headquarters in Shanghai, our company has subsidiaries and R&D centers across China, the United States, and other parts of the world. With a cutting-edge digital portfolio and a mission of broader access to healthcare for all, we help drive industry progress and bold change.

Unveil life's essence

In today's era of artificial intelligence in medical advancements, United Imaging's MRI is evolving to create the industry's latest technology platform, uAIFI.LIVE. The uMR Ultra combines advanced intelligent imaging algorithms by utilizing the power of a high density RF system married with high-performance gradients that push the boundaries of high computing power. This platform realizes the combination benefits of driving extremely high precision data and spatiotemporal integrated intelligence, unlocking unprecedented capabilities for observing the human anatomy.

The uMR Ultra has emerged to become MR LIVE scanner. It breaks through the limitations of traditional MR static imaging and, helps us to decode the real - time state of the human body. We confidently embrace this technological leap

that is destined to trigger a revolution in the field of medical imaging. This new horizon will strengthen the collaborative power with our customers, taking the lead in the AI-driven industrial revolution. Together with you, we will define this new era!

Witness LIVE Imaging

From **photography** to **videography**, witness the revolutionary leap in MRI technology to visualize and embrace life in motion.

Discover the uAIFI.LIVE system

Ultra performance across hardware and software, establishing industry leadership in the 3T system, extending your community's clinical capabilities.

Embrace new experience

From head to toe, its advanced imaging system provides clarity and accuracy, forming the cornerstone of confident diagnoses. Supported by state-of-the-art hardware and innovative software, the uMR Ultra enhances clinical workflows and contributes to both breakthrough discoveries and improved patient care.

Witness LIVE Imaging

Since the inception of MRI, motion has been one of the greatest challenges in imaging. For decades, the industry has explored various technologies to 'freeze motion.' Today, the innovation of uMR Ultra promises a world of MRI unbound by motion constraints—a

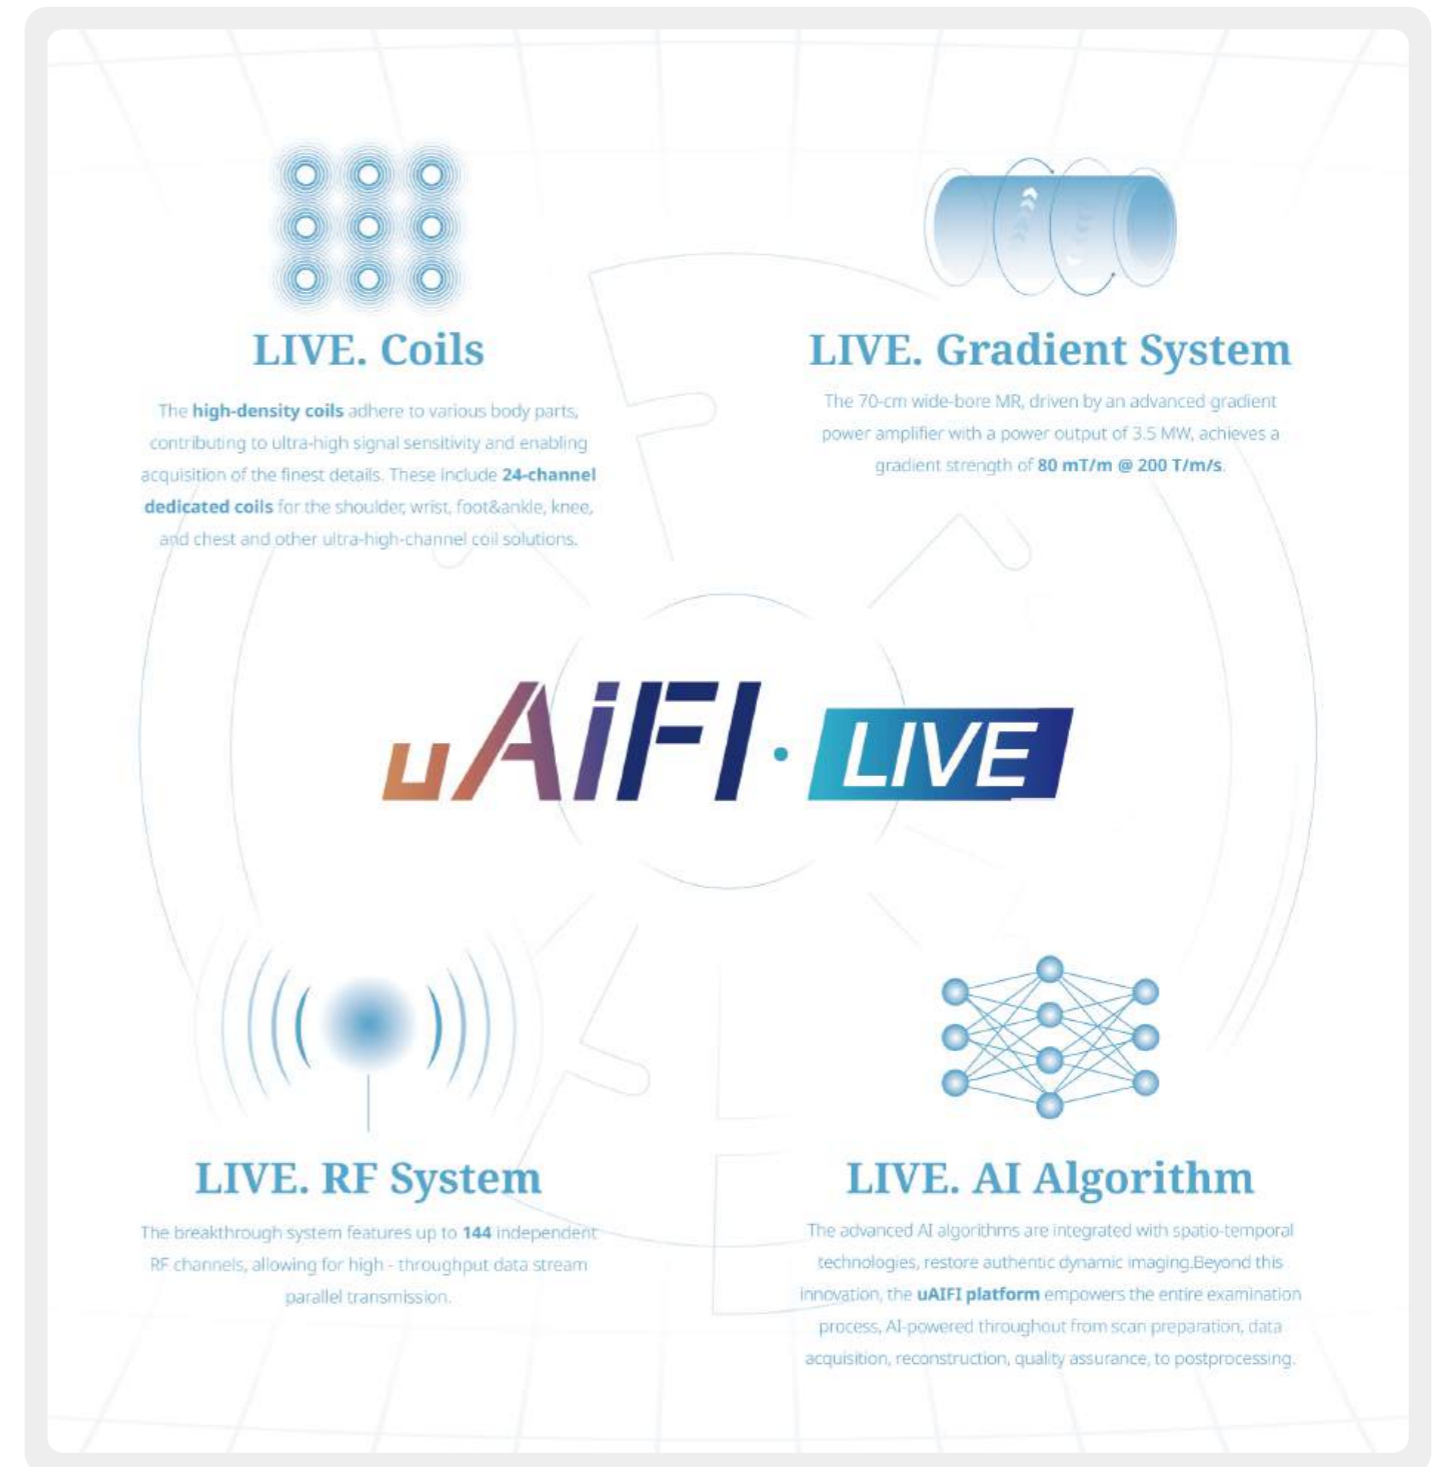

realm where we can observe the human body's true state. As we open a new dimension of MR imaging, a comprehensive transformation in diagnostic standards is inevitable.

Discover the uAIFI.LIVE system

uAIFI.LIVE is the latest innovative achievement, serving as an intelligent core that integrates the system's major elements to achieve spatio-temporal decoding of the human body. Much like a high-

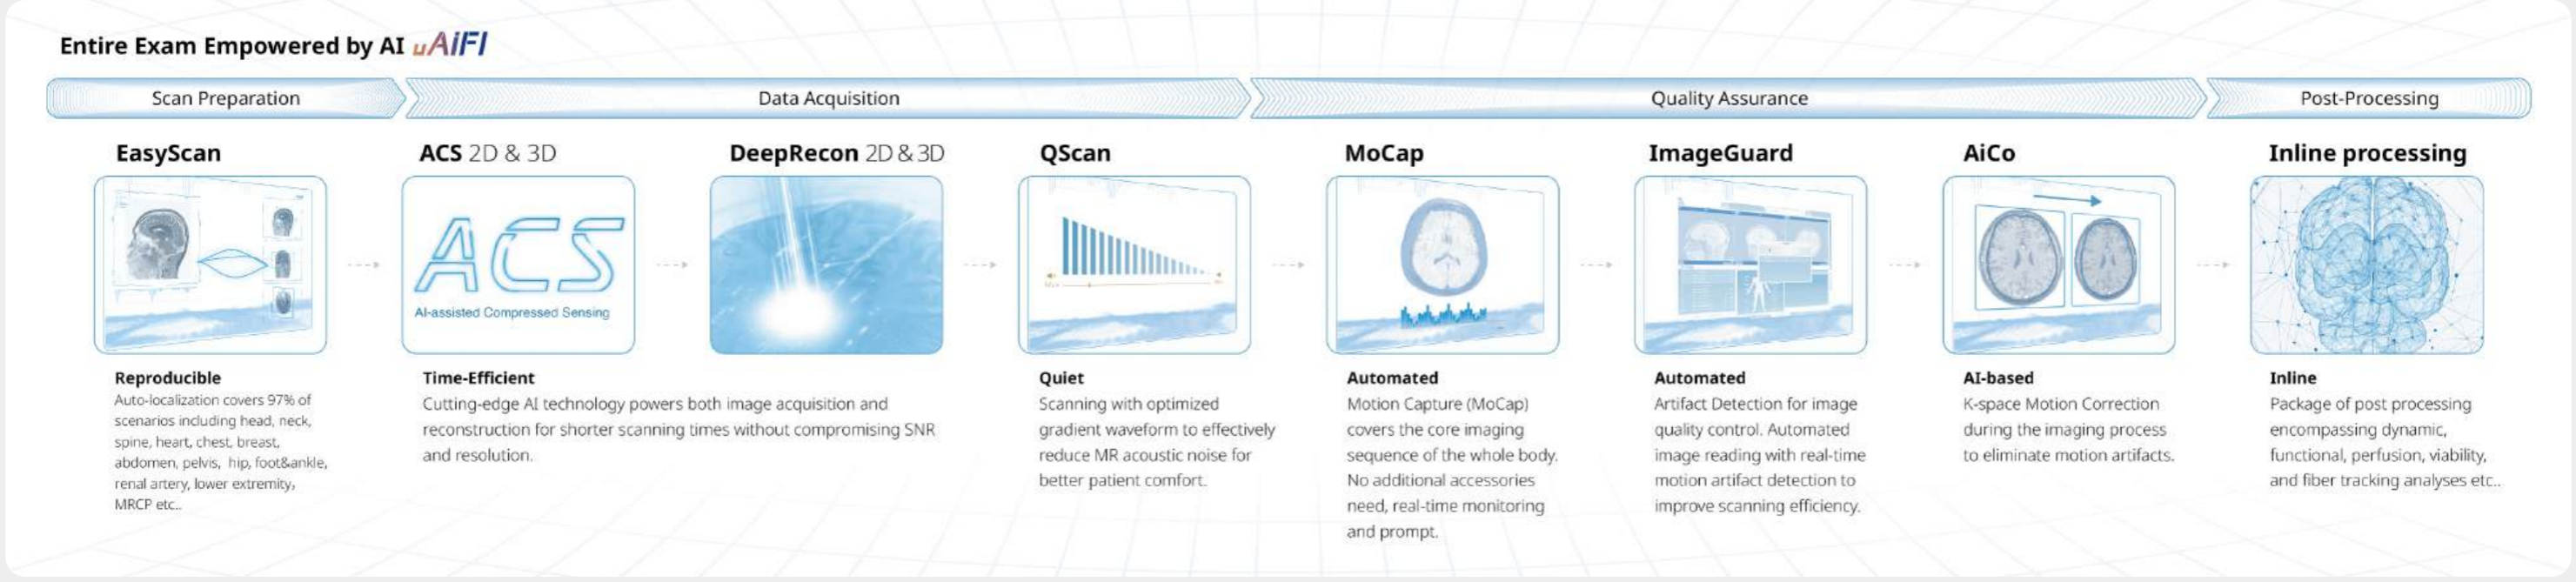

end cinema camera, the uMR Ultra transforms 'photography' to 'videography' with the revolutionary power of the uAIFI.LIVE platform.

Embrace new experience

Imaging has never been so intelligent

Enhance Scan Consistency, Efficiency, and Multi-Center Data Quality.

Coils have never been so flexible

Blanket-like, high density SuperFlex Coils, dedicated for every body parts.

SuperFlex Whole Body - 48

SuperFlex Body - 24

Shoulder Coil - 24

Wrist Coil - 24

UHD SuperFlex Large - 24

UHD SuperFlex Small - 24

※ Disclaimer: This flyer is intended for professional communication only. Final product specifications are subject to change. Not all coils are registered or approved for sale in all regions. For detailed information, please consult your local sales representative.
