

TIMS MVP FOR MBS

THE GOLD STANDARD

INNOVATIVE RECORDING

Synchronized video and audio recording with semi-automatic labeling increase the feasibility of protocol implementation.

SUPERIOR WORKFLOW

MBS-specific scoring, notes, and snapshots make reporting a breeze. Send studies to TIMS Review to maximize equipment use and increase efficiency in review, editing, and assessment. As the analysis is completed, information is automatically pulled forward into the report - reducing documentation time.

OBJECTIVE MEASURES

New measurement tools allow clinicians to include objective measures in study analysis, such as hyoid movement, bolus percentages, anatomical changes, and more.

TIMS REVIEW SOFTWARE

INNOVATIVE SOLUTIONS

TIMS Review allows studies to be edited and reviewed in your office instead of a busy fluoro suite or from your FEES cart, increasing efficiency and enabling more studies per day. The feature-rich toolset provides healthcare professionals with everything they need to make an accurate diagnosis and develop individualized care plans.

ADVANCED FEATURES

Innovative tools allow clinicians to utilize objective measurements, standardized scorecards, telestrations, series notes, and more.

CUSTOMIZED REPORTING

Consolidate analysis and reporting with notes, telestrations, snapshots, and scorecards. As you analyze, TIMS pulls together the information in report templates customized to meet your needs.

WHAT USERS ARE SAYING ABOUT TIMS REVIEW

93%

“Improved efficiency in reviewing and analyzing MBS/FEES.”

91%

“Has positively impacted patient outcomes.”

5 - 30 minutes

“Average time saved per study for review and analysis.”
